

Congratulations to UMA Students Achieving the Asean Innovative Science And Entrepreneurship Fair

Achievements were carved by students of the University of Medan Area (UMA), this time a student of the Faculty of Economics & Business Management Study Program named Ade Rivana Sitorus (178320195) Co-lecturer Dr. Syahfrida Hafni, SE.M.Si won a bronze medal at the Asean Innovative Science and Entrepreneurship Fair Competition.

The Asean Innovative Science and Entrepreneurship Fair (AISEF) 2020 contest. Which was held in Surabaya precisely, namely the BG JUNCTION MALL on 14-16 February 2020, was a combination of competitions and exhibitions in the fields of Science and Invention which were attended by elementary school students to university students. In addition, AISEF is also an event that is designed for young researchers both from within and outside the country to showcase the results of their research and invention products.

According to the President of IYSA, Deni Irawan, the specific purpose of AISEF is to increase the interest of Indonesian students in particular and International students in general towards the world of research and invention. In addition, it can provide opportunities for students in Indonesia to display their research findings and inventions at the event.

For the achievements of the Bronze Medal obtained, Medan Area University congratulates and is very grateful, and hopes that in the future students, SMEs in UMA will get more championships from other fields.
